Sometimes you may want to search a specific research database:

- The library search includes many of our research databases, but it does not include all of them

- Even for those it does include, you can better target your research when you search an individual database (using full-text searching, database-specific terminology, etc.)

- Results in a database are often more current than those from the library search
Databases with the NPS logo next to them are licensed for NPS users only. If you are not already logged in you will be prompted for your NPS login and password after you click on one.

Alternatively, you can come in through the VPN.
